**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert D. McCutcheon on March 21, 2007.

The application has been amended as follows:

***In The Claims***

61. (Currently Amended) ~~An article including one or more machine-readable storage media~~  
A computer-readable medium containing instructions to be executed by a computer to manage calls within a telephony system, the instructions when executed causing ~~a controller~~ the computer to:

receive a call request to establish a call, the call request defining a throughput requirement and comprising an origination address for identifying an origination terminal and an identifier for identifying a destination terminal;

transmit a throughput measurement request in response to the received call request, the throughput measurement request causing a trace to propagate via a path between the origination terminal and the destination terminal;

in response to the trace, receive information identifying one or more network resources on the path between the origination terminal and the destination terminal;

Art Unit: 2616

monitor one or more performance characteristics of the one or more network resources identified to generate a throughput measurement of the path; and

transmit a call admission response to the origination terminal when the throughput measurement at least substantially matches the throughput requirement of the call request.

***Allowable Subject Matter***

2. Claims 1-12, 14-43, 45-61, and 63-66 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest transmitting a throughput measurement request in response to the received call request, the throughput measurement request causing a trace to propagate via a path between the origination terminal and the destination terminal; in response to the trace, receive information identifying one or more network resources on the path between the origination terminal and the destination terminal; monitor one or more performance characteristics of the one or more network resources identified to generate a throughput measurement of the path, as specified in independent claims 1, 32, 61, and 63.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh-Vu H. Ly whose telephone number is 571-272-3175. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.
